Thanks to @dczombera for an awesome first PR to @babeljs! (always welcomed better syntax error messages) github.com/babel/babel/pu... cc @fivetanley

```
repl: Only expressions, functions or classes are allowed as the `default
` export. (1:15)

> 1 | export default const MyComponent = () ⇒ {
    |                ^
  2 |    return `<div class="foo">HI</div>`;
  3 | };
```

🎉 What a surprise! @MarinaGJCho and I were chosen #RGSoC2018 team officially! We are so excited to be open source contributors on @babeljs on this coming summer! Thank @RailsGirlsSoC and @left_pad for welcoming invitation to open source community. 💖 #RGSoCSunshine

Want to give a shoutout to one of our Babel team members @existentialism, not simply hard work regarding issues and PRs but with ideas and presence (and helping me edit basically anything I've written including all blog posts + talks) 🙂, you're awesome!
